

Wednesday 4th November 2015

**Summary: CICASP Seminar 13
Publishing Papers and Peer Review**

This seminar focused on what happens to a manuscript after submission. Fred first provided some background information about the review criteria, acceptance rate, and impact factor of three journals: *Nature*, *PLOS ONE*, and *Primates*. He then explained the process of evaluation of manuscripts from the time of submission to the time that the author receives notification of a decision. Finally, using his own experience, he led the students through the process of how to reply to a specific reviewer comment.

Wednesday 18th November, 2015

**Outline: CICASP Seminar 14
Publishing Papers and Peer Review**

This session will enable students to practice and learn how to address reviewer comments on a manuscript. If you have had any issues with the review process, please send the reviewer comments to Fred and he will incorporate them in to the workshop. We plan to evaluate reviewer comments and formulate responses to the comments during this session.

Note: Wednesday, 11th November, is the Director's meeting, so there will be no CICASP Workshop/Seminar.
