

Wednesday 3rd February, 2016

Summary: CICASP Seminar 20

Where's the Logic? Illogical arguments in debates and how to spot them

This session was the last in the block of three covering logical fallacies. The topic under debate was whether or not the symbol, used on tourist maps in Japan to denote Buddhist temples, should be changed. All four teams showed creative and diverse use of logical fallacies in their arguments. It was clear from all the point scoring, that everyone has become very practised at identifying illogical arguments and spotting different types used. You will now be able to apply this knowledge when listening to real-world debates and reading written arguments.

Outline: CICASP Seminar 21

Practice Presentations for PWS Annual Meeting

The next three CICASP Seminars (17th Feb, 24th Feb, 2nd March) will give students the opportunity to practise their poster and oral presentations before the upcoming 5th International Symposium on Primatology and Wildlife Science (3rd-6th March). There will be limited space per session – about three presenters. Take this chance to get valuable feedback and to practise your presentation skills.
