

CICASP Seminar in Science Communication: Outline

Thursday 26th April, 2018 (5 pm)

Summary: CICASP Seminar #76

Grant Writing Masterclass

In this seminar, attendees will learn tips on how best to write grant applications, as well as what is best avoided. This seminar is timed especially to help students preparing JSPS grant applications. However, this seminar will be useful for everyone, in preparation for writing grant applications in the future. This is a valuable opportunity to learn from an academic with a successful record in this area, to increase your chances to obtain funding for your studies.

We will consider adding a second grant-writing workshop, if there is demand for it, on Wednesday May 2nd at 5 pm.
