

CICASP Seminar in Science Communication: Summary

Thursday 20th September, 2018 (2 - 4pm)

Summary: CICASP Seminar #85

Follow-up Workshop on Education Programs

In our previous workshop on Education Programs, the audience learned how to design, plan, implement lessons focus on wildlife education, as well as evaluating tools, depending on budget, target audience, and the message they want to deliver.

Thanks to the positive response of the audience, this follow-up workshop will give the chance to the participants to present their ideas and plans for their own education programs. Their task will be to explain their strategies for implementing and evaluating the programs in approximately 10 minutes. After each presentation, they will receive feedback from the audience, in a discussion led by Dr. Xyomara Carretero-Pinzón, regional coordinator of Primate Education Network for Colombia and Venezuela (Volunteer).

Everybody is welcome to attend and learn about the plans for education programs that will be implemented in Japan and abroad. Those who attended the previous workshop will certainly provide good feedback on the programs, and those who missed it will have another chance to learn about planning and implementing education programs.

If you wish to present and have not contacted me, please send me an email <rafaela.takeshita.3n@kyoto-u.ac.jp>
