

CICASP Seminar in Science Communication: Outline

Wednesday 21st November, 2018

Outline: CICASP Seminar #91

The Good, the Bad, and the Ugly of Presenting

In this block of workshops, students work through the mechanics of identifying problems in presentations and then fixing them. This is a 2- or 3-block workshop in which the first workshop (November 21) models the process of going from *Bad* to *Good*, the second is aimed at in-class presentation development, and the third reserved for student presentations showing the process of good to bad. Throughout the workshop, participants will have plenty of time to discuss the good, the bad, and the ugly of presenting. This block of workshops is aimed at students of all levels and will help them think critically about their own presentation development. The presentations will be short (~3 minutes) and on a topic to be determined later.
