Research Activity Report Supported by "Leading Graduate Program in Primatology and Wildlife Science"

(Please be sure to submit this report after the trip that supported by PWS.)

	2014. 7, 7
Affiliation/Position	Wildlife Research Center/M1
Name	Kei MATSUSHIMA

1. Country/location of visit

Japan, Kumamoto Sanctuary

2. Research project

Comparative Cognitive Science Course

3. Date (departing from/returning to Japan)

2014. 6. 17 – 2014. 6. 20 (4 days)

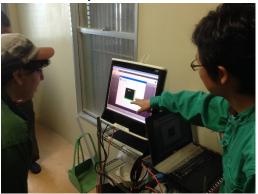

4. Main host researcher and affiliation

Kyoto Univ. WRC Kumamoto Sanctuary

5. Progress and results of your research/activity (You can attach extra pages if needed)

Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.

The purpose is to study the basic method how to study comparative cognitive science through some cognitive experiments and observations on chimpanzees and bonobos. I experienced observations and touch panel experiment and eye tracker experiment as actual used experiments. It was very short time to know a lot about chimpanzees and bonobos, but it was very interesting to know how they are like humans.

Eye tracker

Touch panel

6. Others
