

**Research Activity Report**  
**Supported by “Leading Graduate Program in Primatology and Wildlife Science”**  
(Please be sure to submit this report after the trip that supported by PWS.)

2015.6.16

<b>Affiliation/Position</b>	Faculty of Science, Kyoto University
<b>Name</b>	Shuhehi Hirota

<b>1. Country/location of visit</b>
Yakushima
<b>2. Research project</b>
Yakushima field research (fungi group)
<b>3. Date (departing from/returning to Japan)</b>
2015.5.23– 2015.5.29 (7 days)
<b>4. Main host researcher and affiliation</b>
<b>5. Progress and results of your research/activity</b> (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>In this course, we collected mushrooms, and analyzed the distribution of mushrooms. We chose 5 research sites considering environmental factors like altitude, or precipitation, and so on, and we conducted the collecting for 3 days. It was my first experience of collecting samples in the field outside, so I couldn't find mushrooms easily at first. However as I got used, I could see mushrooms here and there. It was good experience. And I also found there was much kind of mushrooms than I thought. The data which we got in this research will be helpful for the research of environment in Yamushima Island.</p>
