

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2019. 8 th . Apr..	
Affiliation/Position	Primate Research Institute/D1
Name	Yuri Kawaguchi

1. Country/location of visit
Kyoto, Japan
2. Research project
Nerd Nite
3. Date (departing from/returning to Japan)
2019. 6 th Apr.
4. Main host researcher and affiliation
5. Progress and results of your research/activity (You can attach extra pages if needed)
<p>Nerd Nite is the style of event where people can join talk with glass of beers in casual atmosphere. Topics cover widely such as science, art, history etc. I have been interested in science communication since I visited Vienna the last summer. They held nice science event which people enjoy science, beautiful tourist spot, drink at the same time. It was very impressive. We don't have such events but I thought we should have informal science event too in Japan. That's why I attended it this time. The topics were broad: “japaning”, hygiene behavior in primates, and diagram. I enjoyed a lot and learned how to present one's research to public audience effectively. One of the participants was a science communicator and it was also good opportunity to talk with her. However, only less than 20% of around 30 participants were Japanese. One (and maybe primally) reason should be that all talk was done only in English. I thought it would be nice if such event become more popular in Japan.</p>

One of the presenter was Cecile
6. Others
This travel was covered by PWS. I appreciated for that.
