<p>I participated in the 8th meeting of Innovate “SHITSUKAN” Science and Technology. This “SHITSUKAN” study is one of the Grant-in-Aid for Scientific Research on Innovate Areas by MEXT and the purpose is to understand human recognition of material properties. Researchers from a variety of study backgrounds, for example, psychology, technology, informatics, the arts got together and discussed how to develop each study. I listened to their presentations and someone gave advice for my study. I want to work on my research making use of this experience.</p>
