

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
(Please be sure to submit this report after the trip that supported by PWS.)

2017. 09. 18	
Affiliation/Position	Primate Research Institute /D1
Name	Makiko Take

1. Country/location of visit
Toyama University (Japan)
2. Research project
The 2017 Annual Meeting of the Mammal Society of Japan
3. Date (departing from/returning to Japan)
2017. 09. 08 – 2017. 09. 11 (4 days)
4. Main host researcher and affiliation
None
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>I used this opportunity to see the ongoing mammal studies in Japan, and to build the connections with Japanese mammal researchers.</p> <p>Many of the presentations were about conservation or wildlife management in Japan. Because I am from a small village in Tohoku, the crop raiding by Japanese Macaque and Sika deer, one of the hottest topics in the meeting, is not other persons' matter. I felt uncomfortable a little bit because I am now working on saki monkeys in Amazon. I am not contributing to Japanese wildlife matters. I do not have the solution for this my internal conflict so far.</p> <p>Through the drinking parties at nights, I talked with many master students and doctor students. I am not sure if I could justify my research questions to them. I need to read and learn more to translate the interesting points of my study to people who do not major in primatology.</p> <p>Overall, there were a lot of stimula which urged me to work much harder.</p>

Ocean view of Toyama bay
6. Others
I would like to thank to PWS for the financial support. I also thank to Dr. Shun Hongo, who invited me to this meeting and helped me a lot during this trip.
